EXPERIENCE

Zummit Info labs - Remote

Jun 2024 – Nov 2024

Web Developer Intern

- Developed responsive **React components** using **Tailwind CSS** integrated RESTful APIs into core Dashboard modules, ensuring secure data persistence and state management.
- Resolved complex **overlay and layout issues** across 5+ key views, significantly improving user navigation.
- Contributed to a 5-member cross-functional team within an **Agile environment**, participating in sprint planning and daily stand-ups to meet project deadlines.

Techplement - Remote

Apr 2024 – May 2024

Web Developer Intern

- Designed comprehensive **Figma prototypes** for major user flows, bridging the gap between design concepts and frontend development.
- Developed critical **Doctor and Administration frontend modules**, implementing complex business logic with a focus on intuitive user interaction.
- Achieved a **15-20% reduction in page load times** by implementing **Lazy Loading**, code splitting and efficient asset optimization.

Open-Source Connect - Remote

Aug-2025 – Sep 2025

Open-Source Contributor

- Implemented a global **Dark Mode** feature, improving accessibility and UI consistency across the platform.
- Successfully resolved critical technical issues and collaborated best practices an open-source environment with mentors to align on codebase best practices.
- Contributed to **3 diverse repositories**, demonstrating the ability to integrate into established workflows and follow strict PR guidelines.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, C

Databases & Backend: Node.js, Bun.js, RESTful APIs, SQL, MongoDB

Frontend & Frameworks: HTML5, CSS3, React.js, Next.js, Tailwind CSS, Bootstrap, Radix UI and DaisyUI

UI/UX & Animation: Figma, UI Design, GSAP (Green Sock Animation Platform), WebGL, Three.js, Framer Motion, Aceternity UI, ShadCN UI, UI-Layouts.

Version Control Tools: Git, GitHub.

Deployments: Vercel, Netlify.

Tools & Other: WordPress, Prompt Engineering, OpenAI APIs.

EDUCATION

Gates Institute of Technology

2021 - 2025

Bachelor of Technology in Computer Science Engineering (Artificial Intelligence)

PROJECTS

Full Stack Online Examination Portal | *React.js, Tailwind CSS, Node.js, Express.js, SQL*

- I collaborated on an end-to-end assessment platform designed to automate coding evaluations and student grading workflows.
- Contributed to the development of backend logic (Node.js/SQL) to handle real-time submission processing and persistent result storage.
- Developed the administrative dashboard and student interface using React.js and Tailwind CSS, ensuring a high-performance, low-latency testing environment.

AI Resume Analyzer | *React.js, React-Router V7, Puter.JS, Tailwind CSS & ZUSTAND* | [Live](#)

- Leveraged **Puter.js** to manage cloud-based file systems and backend logic, eliminating the need for a traditional server while maintaining high-speed ATS scoring.
- Integrated **Zustand** for centralized state handling and **Puter Auth** to implement secure, persistent user sessions and document privacy.
- Implemented **React-Router-V7** to manage multi-stage data flows, handling asynchronous AI processing requests without UI blocking.

AI Image Enhancer App | *React.js · Tailwind CSS · PicWish API, Webpack* | [Live](#)

- Built and deployed a web application leveraging **PichWish's AI-powered API** to enhance images, demonstrating strong **API integration** and **asynchronous logic handling** skills.
- Designed with modern **UI components** and **responsive design**, enabling users to upload, preview and download enhanced images seamlessly.
- Managed **component-level state** effectively to handle image processing workflows and user interactions.

ACHIEVEMENTS

- 1st Place Winner - College Hackathon: Developed an automated coding assessment platform for college students.

Certifications & COURSES

Google

AI Essentials

Certificate

- Mastered fundamental AI integration techniques to streamline development workflows and enhance application intelligence.
- Applied advanced prompt engineering and AI-driven automation to optimize software debugging and content generation processes.

FreeCodeCamp

Responsive Web Design

Certificate

- This certifies that I completed the responsive web design developer certification on April 14, 2023, representing approximately 300 hours of work.

Legacy JavaScript Algorithms and Data Structures

Certificate

- Demonstrated proficiency in complex problem-solving by completing 300+ hours of rigorous algorithmic challenges and data structure implementations.
- Developed robust logic for dynamic web applications, focusing on efficient memory management and optimized execution speeds.
